

Samsung E900 - Purely Class

One of the most reputed names in the world of mobiles is Samsung. It has earned its reputation of being the number one in the field of mobile manufacture by continuously churning out outstanding mobiles one after the other. Its recent offering Samsung E900 is no different. Packed with some outstanding features, it is being lapped up by the public. A good looking phone with camera, it comes with a slide opening feature.

The phone includes stylish, touch sensitive external keys which shines when used. The mobile also includes a wide variety of colour display which becomes evident whenever the phone is slid open or close.

As far as its features are concerned they are also outstanding and plenty. First of all it includes 80 M bytes of internal memory which can be further increased by using the swappable MicroSD™ memory card feature. The mobile can also be connected to PC, laptop and printer by using a Blue tooth wireless connection or USB wired connection. The phone is armed with EDGE technology that allows data transfer and data download thrice as quickly as GPRS. WAP and XHTML are also included in the handset and can be used for surfing net.

Samsung E900 also includes 2 mega pixel camera with an in-built flash which can be utilised for shooting still photographs as well as for video recording. Also included in the handset are MP3, ACC+ and WMA music players. It also allows one the freedom to download and transfer music easily. Samsung E900 also includes a speaker phone, voice memo and vibrating alert.

In addition to the above mentioned features Samsung E900 includes Java games which are not only programmed in the set but which can be downloaded as well. It also extends the facility of text messaging, e-mailing, sending and receiving multimedia messages (which can include video, photo, text or sound) and document viewer.
